What is the Luminette useful for ?

The Luminette helps to fight against winter blues, sleep problems and circadian rhythm issues (jetlag, night shifts).

Luminette® is portable and lightweight (67g), letting you go about your activities, while providing ideal light exposure.

Unique Selling Proposition

Portable

Let you go about your business while providing ideal treatment.

Light & pocket size

Portable for travel, household activities, commute or work.

Effective & patented

Realized after 4 years of university research and clinical trials. Proven to enhance energy and adjust sleep patterns.

Universal

Works for all users thanks to its adjustable nosefit.

How often should I use the Luminette ?

1 time per day

How long does one session last ?

20 minutes per day

After how long do I feel the effects ?

After 4-5 days

What is the role of light ?

Light as « regulator »
of our body clock

Our internal clock is synced to the pattern of the sun. Light has an effect on our melatonin secretion, also called «sleep hormone» which controls the body's circadian rhythm. The brain starts producing it when the sun sets, in order to encourage us to sleep. But as the sun rises and the light increases, the brain stops producing it. We get up easily, full of energy.

Light as
natural energizer

Exposure to light has been shown to improve alertness, mood, energy and physical performance.

Features

-  Charging status signal
-  End of charge signal
-  3 intensity levels
-  Built-in timer
-  Rechargeable by micro-usb connection
-  Start system on/off

Safety

The Luminette® is compliant with European directive for medical devices: 93/42 EEC and is inspected every year by an independent control organization (SGS). Luminette® is also classified as a risk-free device with regard to Standard IEC 62471. The spectrum used by Luminette is free from UV and infrared light. Luminette® was designed to allow for regular, extended use. More than 25,000 users have enjoyed it since its creation.
